

Efficiency offered to companies selling customized products

Tacton Configurator is a general purpose sales configurator that interactively helps the user to find the optimal product configuration according to the needs.

Integrated with Jeeves Enterprise, sales people have a powerful tool to quickly suggest the customer an optimized product solution, create a proposal and place a customer unique order directly into Jeeves Enterprise.

Used in an eCommerce solution, end-users can guide themselves to the best product solution based on their needs.

"A modern business system, providing support for rapid change"

-IVT Industries about Jeeves

"...an easy-to-use and effective configuration sales tool that significantly shortens the process of selling complex products."

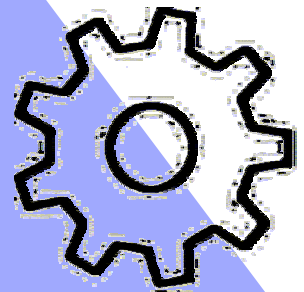

-Aberdeen Group about Tacton

1

Tacton Configurator interactively creates a correct order specific bill-of-material for the customer's needs

2

The order is stored and thereafter managed as usual in Jeeves

Low total cost of ownership

The close integration between Jeeves Enterprise and Tacton Configurator results in a low total cost of ownership.

- Your data is stored in Jeeves Enterprise and does not have to be duplicated
- The information flow is completely automatic

Tacton Configurator has a graphical modelling environment, making it easy to create and maintain configuration models. The configuration constraints are expressed in terms of general product features and specific product data is automatically recieved from Jeeves Enterprise.
